Sleek and elegant design

The SlimLine 38 door system comes in multiple design variants and offers quality in every detail.

Perfect for both minimalistic new-builds and renovation projects, the timeless steel-look design blends perfectly with any architectural style.

Variants such as balcony doors or terrace doors with optional triple glazing help you to reach today's energy efficiency standards.

SlimLine 38 is both an elegant and ecofriendly system, providing a low carbon, Cradle to Cradle® certified solution. Experience quality whenever you open or close this aluminium door.

Futureproof and durable

With less material needed to create these slender yet sturdy doors, the carbon footprint of SlimLine 38 is extremely low. It is 100% recyclable and features high-insulation variants to meet your low-energy building needs. Choose slimline design without compromising on quality or comfort.

Slim steel-look design

The timeless steel-look design of the SL 38 door, combined with the benefits of aluminium profiles, makes this system perfect for renovation projects. The Classic and Ferro design variants, together with its various opening types, allows you to add a personal touch.

High-quality finishing in every detail

Multiple threshold solutions combine elegant design with pure practicality. Enjoy show-stopping craftsmanship with refined doors of up to 3 metres in height.

SlimLine 38 Doors Options

Concealed hinges

All hardware including hinges are subtly concealed inside SL 38s slimline profiles, creating a sleek and contemporary appearance.

Concealed drainage

Plastic cover caps are no longer needed to hide drainage holes. Enjoy clean lines, minimalistic design, and excellent performance.

Panic solution

In public buildings, a quick and safe escape route should always be available. Anti-panic technology guarantees secure passage in dangerous situations.

Ultraslim

For an even more refined look, our Ultraslim option featuring in-glass lock plate is a great option. This is our slimmest vent profile in our entire door systems range.

Recognisable by their minimalistic yet elegant appearance, these slim yet sturdy doors create an aesthetic entryway for any building.

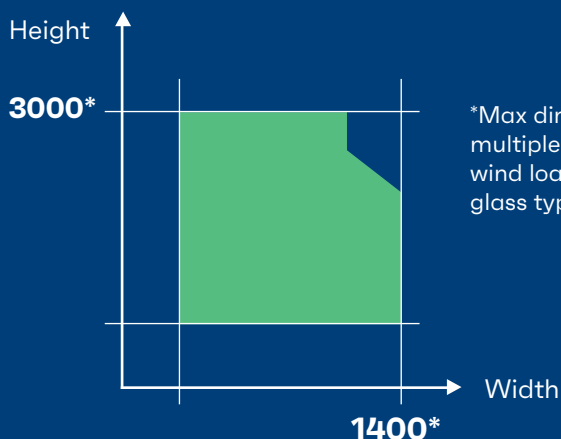

Sustainability

SlimLine 38 doors are always a responsible choice. This Cradle To Cradle Certified® system has a high insulation variant and features ultraslim profiles which require less aluminium to make. As a result, the doors have a lower embodied carbon level than most competitor systems. What's more, aluminium is 100% recyclable, which means you can re-use it an infinite amount of times without loss of quality.
